O₃ ozone system

Hygiene has always been a main concern for the consumer when purchasing a bathtub with a water massage system. therefore it was essential to us to find a way to thoroughly sanitize the entire bathtub system. Our O₃ Ozone System is the answer.

With our water detector probes, it takes care of everything at the right moment! After each and every use, the O₃ Ozone System automatically turns on 1 hour after the jetting shuts off and starts a cleaning process for a period of time.
