

Heated Backrest AND Seat!

Thermotherapy in the comfort of your home.

The comfort of being completely submerged in hot water has always been considered the ultimate pleasure in relaxation and home thermotherapy.

But what about the neck and shoulder area that often carries the most weight of our daily stresses and fatigue? It is often quite complicated to get that much needed warmth to the area where tension accumulates the most.

In contact with the warmth of the bathtub surface, the skin thermoreceptors in the neck and shoulders release the endorphins necessary to soothe the aches and pains trapped in the trapeze muscles and eliminate the accumulated tension to induce complete and utter relaxation.

Eco-friendly, the Heater seat & back system consumes less energy than a common 60 watt light bulb. Our Heater seat & back System heating pad can be installed with either:

- 3M contact glue on the external surface of the bathtub.
- 3M double-face adhesive.
